# 1 Introduction

## 1.1 General

This document is intended to be a more extensive, long form description and route for Top Dog (all achievement) runs of Okami. While the instructions can be followed step by step a lot of the time, additional safety pick ups and actions were implemented to ensure that the necessary thresholds regarding money, praise and items will be met.

Some backup solutions are mentioned in case of shortage of any of the resources towards the end of the notes, before the point of no return. Not all the required actions throughout the run are noted, some obvious and self-explanatory or redundant steps are omitted to make the notes less cluttered and improve readability. For this reason, it is still very much advised to study videos of finished runs and ensure that the route is clear throughout the run.

## 1.2 Further Resources

The following is a list of (strongly) recommended readings and videos that should be consulted, as they help with various areas of the run and game in general:

- [https://www.speedrun.com/okami#Top\\_Dog](https://www.speedrun.com/okami#Top_Dog) - Leaderboards, rules, forum discussions, resources
- [https://okami.speedruns.wiki/Main\\_Page](https://okami.speedruns.wiki/Main_Page) - Information collection, including categories, tricks, glitches and skips
- <https://www.youtube.com/watch?v=QUmWvUQTsBQ> - Video by Auride explaining the central movement mechanics in Okami speedrunning

It is also recommended to join the Okami Speedrunning community in their Discord for further help and discussion: <https://discord.gg/AQNKmMu>

## 1.3 Terminology

While the majority of the notes can be read as is, some special terminology is used for brevity. This mainly pertains to specific tricks or glitches so they do not have to be explained in detail, as well as brush techniques when their official name can be shortened significantly. The following list covers all the terms that are not self-explanatory to a new runner. Where applicable, further readings or sources are provided that explain the respective topics in greater detail.

### 1.3.1 Glitches and Tricks

- **Auto Wall Jump:** Stacking an automatic jump and a wall jump to result in a higher jump than when both are executed consecutively. Used in Sunken Ship to get to the cannon when the water is lowered.

See [https://okami.speedruns.wiki/Auto\\_Wall\\_Jump](https://okami.speedruns.wiki/Auto_Wall_Jump)

- **Brush Adventure:** Breaking the otherwise restricted camera during brush mode with specific movements, allowing the usage of brush powers from unintended angles and locations. Used in Ryoshima Coast to bloom the Guardian Sapling, in Sunken Ship to raise the water level early, and in Oni Island to skip to the final Tobi race.

See [https://okami.speedruns.wiki/Brush\\_Adventure](https://okami.speedruns.wiki/Brush_Adventure)

- **Early Thunderstorm:** Skipping the majority of the intended route for Oni Island by going out of bounds in the starting area and continuously hopping along the outside walls to rejuvenate the statue of Gekigami and being placed inbounds again.

See [https://okami.speedruns.wiki/Early\\_Thunderstorm](https://okami.speedruns.wiki/Early_Thunderstorm)

- **Merry Christmas:** When prompted to spend money in Divine Springs teaching upgraded version of known techniques, the total money spent can be reduced by first donating the smallest possible amount and then three times the largest amount. The calculation of the money returned is incorrect and results in varying amounts of extra money depending on the cost of the technique.

See [https://okami.speedruns.wiki/Merry\\_Christmas\\_Glitch](https://okami.speedruns.wiki/Merry_Christmas_Glitch)

- **Nechku Skip:** Skipping a significant part of Wawku Shrine, including the Nechku fight, by skipping from the first outside area straight to the area with the five cannons.

See [https://okami.speedruns.wiki/Nechku\\_Skip](https://okami.speedruns.wiki/Nechku_Skip)

- **Stair Clip:** Accessing the Ryoshima Coast Dojo early by clipping into the side of a staircase at Ankoku Temple and jumping out of bounds to drop back inbounds in the dojo.

See [https://okami.speedruns.wiki/Stair\\_Clip](https://okami.speedruns.wiki/Stair_Clip)

- **Yellow Imp Skip:** The first fight after blooming the Hana Valley Guardian Sapling can be skipped with a wall jump, squeezing past the fight rigger on the right side.

See [https://okami.speedruns.wiki/Yellow\\_Imp\\_Skip](https://okami.speedruns.wiki/Yellow_Imp_Skip)

### 1.3.2 Brush Techniques

- **Fog:** Veil of Mist, drawn with two vertical lines. These can be drawn next to each other in one smooth motion.
- **Gale:** Galestorm, drawn by a swirly pattern to the left or right for sideways wind or a spiral pattern to make the wind blow in the direction the camera is facing.
- **Lily Pad:** Water Lily, drawn with a circular shape into the water.
- **Thunder:** Thunderstorm, drawn by connecting a source of electricity with a target.

## 1.4 Legend

The notes are annotated using color coding and symbols to draw attention to the most important parts and to improve readability. Checklists and maps are provided where a textual representation would be impractical. Since some checklists are affected by actions during different parts of the run, underlined hyperlinks are used for a quick access to the respective checklist.

### 1.4.1 Color coding

- **Pickups** - Whenever an item is acquired by means other than buying it from a merchant, the respective item name is highlighted in green text. Story related key items and similar objects are generally not mentioned as picking them up is mandatory and their acquisition tied to cutscenes or similar events in most cases.
- **Usage** - Whenever an item is used or consumed, the respective item name is highlighted in red text. In most cases, this is tied to choosing them from the Items menu.
- **Merchant** - Items bought from as well as the mentions of merchants are highlighted in blue text. This includes the Demon Fangs merchants.
- **Praise** - Actions that result in gaining praise, such as rejuvenating nature, are highlighted in yellow. Note that not all sources of praise will be mentioned as they are also tied to certain story or other events, the cutscenes for which are usually skipped. Some of these events are still mentioned specifically as it may be easy to not fully complete them and thus miss out on the praise gained. Praise gained from feeding animals is also not highlighted yellow as for these actions, the consumed food item is already highlighted in red.

- **Equipment** - Whenever either weapons or artifacts are equipped using the menu, their name is highlighted in violet text.
- **Bounty** - Enemies tied to the wanted list side quests are highlighted in brown text.
- **Brush Technique** - The acquisition of a new Brush Technique is highlighted in magenta color. This includes both main and secret techniques, though some may not be mentioned as they are tied to story events and acquired automatically.

### 1.4.2 Symbols

-  **SB #00(0)** - Every picked up stray bead is annotated with a stray bead symbol additionally to the green pick up text, as collecting all 99 stray beads in the game is one of the central achievements. The first number provided, following the hashtag symbol, corresponds to the associated number in the stray bead menu, allowing for finding specific stray beads in case some were missed. The second number provided, in parenthesis, is the accumulated number of stray beads collected up to that point.
-  ESS,  ESM,  ESL - Exorcism Slips and their different sizes are abbreviated to save space. To maintain readability at quick glance, the respective symbol is shown as well.
-  **Praise**  **Yen**  **Demon Fangs** - At the beginning of (sub)chapters, reference numbers for the number of Praise, Yen and Demon Fangs collected are stated. These resources are both necessary for progress during the game and to obtain the Barking Up The Cherry Tree achievement.

**Praise** is the scarcest of these currencies and should be monitored and followed the most closely. The provided notes and praise pickups will yield a surplus of **23 Praise** after maxing out Ammy's stats towards the end of the run. Some sources of backup praise are listed in the Backup Praise chapter. Note that the provided number also includes Praise spent in the following locations:

- 1 Ink upgrade in Shinshu Field, after Hana Valley
- 2 Ink upgrades in Tsuta Ruins
- 1 Ink upgrade and 1 Wallet upgrade in Moon Cave
- 2 Ink upgrades and 1 Wallet upgrade in Wawku Shrine
- 1 Ink upgrade in Kamui Devil Gates trials

The **Yen** numbers can be followed rather loosely. Starting with the first visit of Sei'an City, money is generally not an issue anymore to buy the things required to complete the route. The main bottlenecks are the purchase of the Double Jump and Digging Champ techniques in Ryoshima Dojo and amassing enough money to buy all remaining combat techniques in the Kamui dojo at the end of the run. Some sources for backup money to meet the final goal are listed in the Backup Money chapter.

**Demon Fangs** are important early on in the run and become a lot less important the longer it goes on, as enemies start to drop them in higher quantities and ink is more readily available to be used on Floral Finishers. The bottlenecks for Demon Fangs are the purchase of the Peace Bell and Golden Lucky Cat after Tsuta Ruins, Fog Pot after defeating Blight, and Water Tablet during the final Sei'an City visit. To help with the first two bottlenecks, loading screen minigames should be enabled roughly until entering Moon Cave.
